Connecting to EduRoam Wifi network

Windows device

When you find on your device a wifi network called „eduroam” you can connect to this network using your institutional email and the password that you have set up at first step.

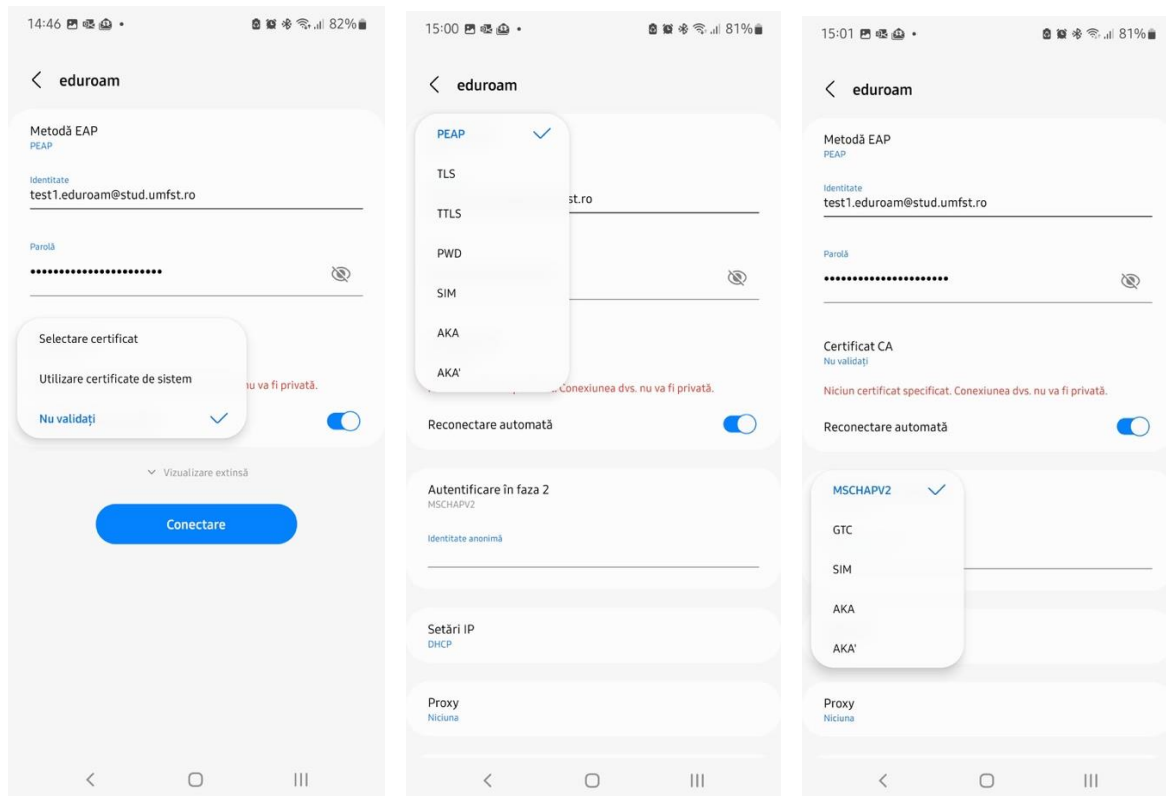

When you want to connect to this network you must insert your username and password. The username refers to your ***Institutional email address*** and the password configured before.

After you press the Connect button you will be authenticated and you will have internet access

For **Android** and **iOS** you will have to select one certificate, and you will select „not validating”, you will select auth method ”PEAP” and phase 2 auth will be ”MSCHAP v2”.

After you enter your username and password and you have selected the elements correctly you can press Connect and you will now have internet access.
